Under the Sea

Dear Family,

Over the next three weeks we will be learning about Life Under the Sea! We will start our new IPC thematic unit with inquiry and play based study and then examine learning objectives for the core competency areas of language arts, science, technology, art, numeracy, social and emotional skills, and motor skills.

We will learn about the oceans and their geographical locations. Towards the end of the study period we will make our own aquarium!

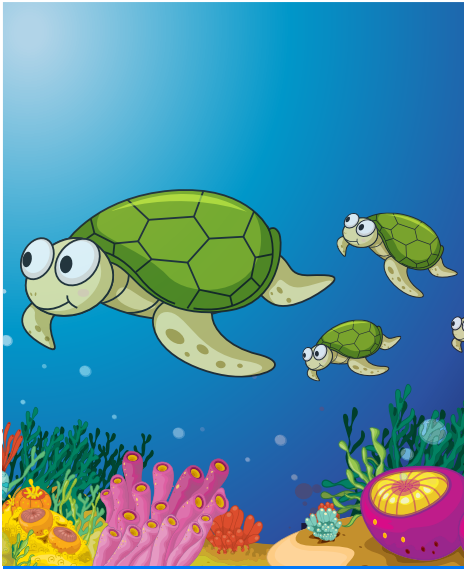

In Language Arts we will read some great books including *"Under the Ocean with the Little Yellow Submarine"* and *"Sea, Sand, and Me!"* We will also practice our tracing skills to improve fine motor development.

In Numeracy, we will sort objects by size, color, and other characteristics.

Under the Sea

In Science, we will learn about seashells, keeping our beaches clean, mammals vs. fish, rocks, and seaweed.

The IPC's research confirms that family involvement in a child's education is vital in fostering the development of early learning skills that are also essential in later life. We therefore encourage parents to engage their child in everyday learning activities.

Sincerely,

IPC Editorial Team

5 Things to do at home with your child

1. Discuss the diverse variety of sea life that lives in the deep sea
2. Consider using the computer to demonstrate real-life images of marine life and their habitats
3. Develop awareness skills by discussing the many careers that have to do with the ocean such as, oceanographer, marine biologist, etc
4. Review order and sequence of events in your day focusing on weekdays and weekend
5. Develop personal awareness for the importance of keeping our oceans clear of litter, discuss the positive effects of a clean ocean and how it can deteriorate the quality of life for the ocean's wildlife
