

Under the Sea

Under the Sea

Second Edition

Introduction

The International Preschool Curriculum® (IPC) sets high standards for early childhood education and provides teachers with a comprehensive framework for curriculum delivery, suggested activities and Assessment. Each thematic unit is drafted by one or more qualified and experienced curriculum drafters and reviewed by an advisory committee consisting of early childhood academics, consultants and teachers. The IPC offers a support network for teachers to discuss their ideas and obstacles and encourages its members to be at the forefront of the organization's development.

IPC Editorial Team

Dr. Erika Burton, Ph.D.

Prof. Donna Skinner, Ph.D.

Dr. Rebecca Reynolds, Ed.D.

Gabriela Brown, M.A.

© **COPYRIGHT NOTICE**

The contents and use of IPC materials are protected by registered trademarks and international intellectual property laws and treaties. Do not disseminate, photocopy, electronically transmit or duplicate any part of IPC materials without express and written consent of the copyright holder. Breach of copyright may result in criminal and civil penalties in a court of the copyright holder's choice in accordance with your agreement with the IPC.

How to Follow and Teach the IPC Curriculum

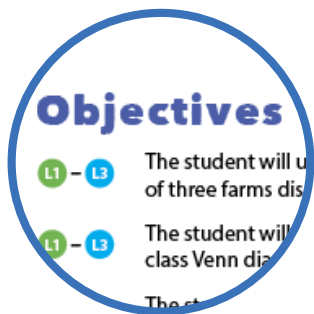

The IPC recognizes six content learning areas and more than a dozen sub content learning areas. Whenever you see this icon, you are following activities within a specific content learning area. By no means should you teach these content learning areas in chronological order, nor should you necessarily teach all activities within the same content learning area in the same day. Instead, the IPC's editorial team suggests around one activity from each content learning area each day. Wherever possible, try to ensure that elements of language, play, numeracy and motor skills are accounted for each day.

The top text summarizes the sub content learning area that is being followed and is intended as a reference guide. The lower text indicates the activity's title.

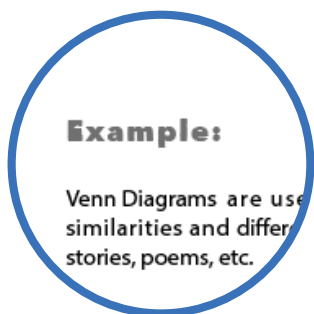

The IPC includes a vast array of classroom and individual student materials. Some materials will also have item numbers, to correspond with the materials provided by the IPC.

In order to benchmark assessment, the IPC uses learning objectives. The same learning objectives may apply for all age groups. In some circumstances, there are level specific objectives which are designed to reflect a more specific age group. The IPC editorial team takes the view that children develop at varying rates and that developmentally appropriate objectives often have no direct reference to age groups. Generally, the IPC suggests L1, L2 and L3 as levels for children aged 3,4 and 5+ respectively.

The activity section provides the teacher with clear instructions on how the activity should be undertaken and supervised. The IPC recommends second or third language instruction and has deliberately designed the activity instructions to be easily adaptable for any language use. These step by step instructions should be read carefully prior to engaging students in the activity. The IPC recommends that teachers plan their daily lesson plans at least one day in advance.

Examples of activity suggestions are provided whenever possible.

Assessments are available on IPC School Manager.

Let's SORT!

1.0

Where Do I Belong?

Sorting and Classification

Materials

- Containers
- **UNS-C1**
- **UNS-S1**

Objectives

L1 - L3

The student will classify sets of objects that belong together using size, color and/or other characteristics as guides.

L1 - L3

The student will compare sets using more or less.

L1 - L3

The student will sort different objects and be able to explain rationale.

Activity

Teacher Note: This activity is best done with small groups of 2-3 students at a time. The teacher will divide **UNS-C1** into containers for each of the students within the group. Multiple copies of **UNS-C1** can be printed and placed into the containers for students.

1. The teacher will gather a group and hand each student a container with several **UNS-C1** cards in it.
2. The students will sort through all of their cards and create groups of cards that they think belong together.
3. The teacher should ask the student to explain their rationale as to why they chose to place those cards in the particular groups.
4. Once all the students have had a turn at sorting the cards, the teacher will pass out **UNS-S1** for students to complete.
5. The teacher should explain the directions aloud to the class.
6. Once all the student have finished their worksheets the teacher should go over the worksheet with the class.

- Teacher observation of student's ability to sort and classify and explain rationale.

1.1

Fish Shapes

Geometry

Materials

- IPC-C4
- IPC-C16
- UNS-C2
- UNS-C3
- UNS-S2

Objectives

- L1 - L3 The student will go on a shape and color hunt.
- L1 - L3 The student will identify some shapes by name.
- L1 - L3 The student will be able to follow simple directions to play the hunt game.

Activity

1. The teacher will gather the class for a quick review of shapes and colors using **IPC-C16** and **IPC-C4**.
2. The teacher will then tell the students how they will all be going on a shape hunt!
3. The teacher will explain to the class that they will be searching for items of specific shapes or colors and will go over the directions of the activity. The teacher will also explain the area in which students are to hunt for their shape or color.
4. Each student will take a **UNS-C2** card and walk around the classroom to look for an object of a similar shape.
5. The **UNS-C3** cards are to be used the same way but the students will need to find an object of a similar color.
6. Following the first round, the students will be asked to switch their shape or color card with a friend.
7. The teacher will allow for students to head back out and hunt for their new object according to their new card.
8. Once the shape and color hunt has concluded, students can work on **UNS-S2** independently.

- Teacher observation of student's ability to match a specific shape or color to an object, as well as name the shape and/or color.

1.2

One Fish, Two Fish

Counting

Materials

- LBRY62
- UNS-C4
- UNS-C5
- UNS-C6

Objectives

- L1 - L3 The student will use seashells for counting by exploring quantity and number.
- L1 The student will demonstrate awareness that numbers represent quantity.
- L2 - L3 The student will demonstrate understanding that numbers represent quantity.
- L1 - L3 The student will use one-to-one correspondence.

Activity

Teacher Note: For this activity use only the numerals of **IPC-C2**.

1. The teacher will begin the lesson by reading **LBRY62**.
2. Next, the teacher will lead the class in a count (L1 students up to 15, L2 students up to 25 and L3 students up to 40).
3. Following, the teacher will divide **UNS-C4** to make groups. Together, the class will count the number of **UNS-C4** cards in each group.
4. The teacher will then go over the instructions of the activity with the class.
5. The teacher will start by spreading out the **UNS-C5** cards on top of a table, with the cards facing up. The teacher will also place a stack of **UNS-C4** at each of the students' tables.
6. The teacher will then have students come up individually and each get a **UNS-C6** card (this step can be skipped for L1 students).
7. After each student has their **UNS-C6** card, they will proceed to the table with **UNS-C5** and select the matching card.
8. The students will then go back to their tables and count out the same amount of **UNS-C4**.
9. One at a time, the students will wait to be called upon by the teacher to say and show the number on their flashcard. The teacher will encourage the students to count together the sea shells in each student's group.

- Teacher observation of student's ability to use one-to-one correspondence when counting.

1.3

Patterns with Fish

Repetition and Pattern

Materials

- UNS-C7
- UNS-S3

Objectives

- L1 - L3 The student will be able to solve simple mathematical problems.
- L1 - L3 The student will recognize duplicates and be able to extend a pattern.

Activity

1. The teacher will gather the class around.
2. Using **UNS-C7** the teacher will create a pattern on the board for the entire class to see.
3. The teacher will ask the class for any volunteers to complete the pattern.
4. The teacher will repeat steps 2 and 3 until all the students have come up to complete the pattern.
5. Next, the teacher will ask the students to reverse roles and start a pattern for the teacher to figure out and complete.
6. Finally, the teacher will have the students return to their desks where they will complete the patterns on **UNS-S3**.

- Teacher observation of student's ability in recognizing, completing and creating new patterns.

1.4

Daily Calendar

Measurement

Materials

- ☐ Colored pencils
- ☐ Crayons
- ☐ Large day schedule
- ☐ Large month calendar
- ☐ Pencils
- ☐ **UNS-S4**
- ☐ **UNS-S5**

Objectives

L1 - L3

The student will begin to understand the order and sequence of events in a day.

L1 - L3

The student will begin to understand that some days are school days and some days are home days, and will begin to name those days.

L1 - L3

The student will work well in group activity.

Activity

Teacher Note: On a daily basis, the teacher should go over the calendar and discuss things such as: the month, day of the month, day of the week, yesterday was..., tomorrow will be... etc.

1. The teacher will begin this activity after the daily overview of the calendar.
2. The teacher will discuss school days and non-school days by asking the students about their free time and weekend activities.
3. Next, the students will go back to their work areas.
4. The teacher will pass out **UNS-S4** to each of the students.
5. The teacher will work with each student, writing exactly what the student says while their drawing displays.
6. After the students have completed their worksheet, the teacher should encourage students to stand up in front of the class and share their favorite parts of the day.
7. To finish up the activity the teacher will hand out **UNS-S5** to each of the students.
8. The teacher should help students fill in the numbers on their calendars. Students should also be encouraged to decorate the top of their monthly calendars.

- Teacher observation of student's ability to participate in daily calendar activity.
- Teacher observation of student's developing awareness of school and non-school days.

2.0

Reading! Reading! Reading!

Reading Comprehension

Materials

- ☐ Crayons
- ☐ Paper
- ☐ Pencils
- ☐ **LBRY63**
- ☐ **UNS-C8**

Objectives

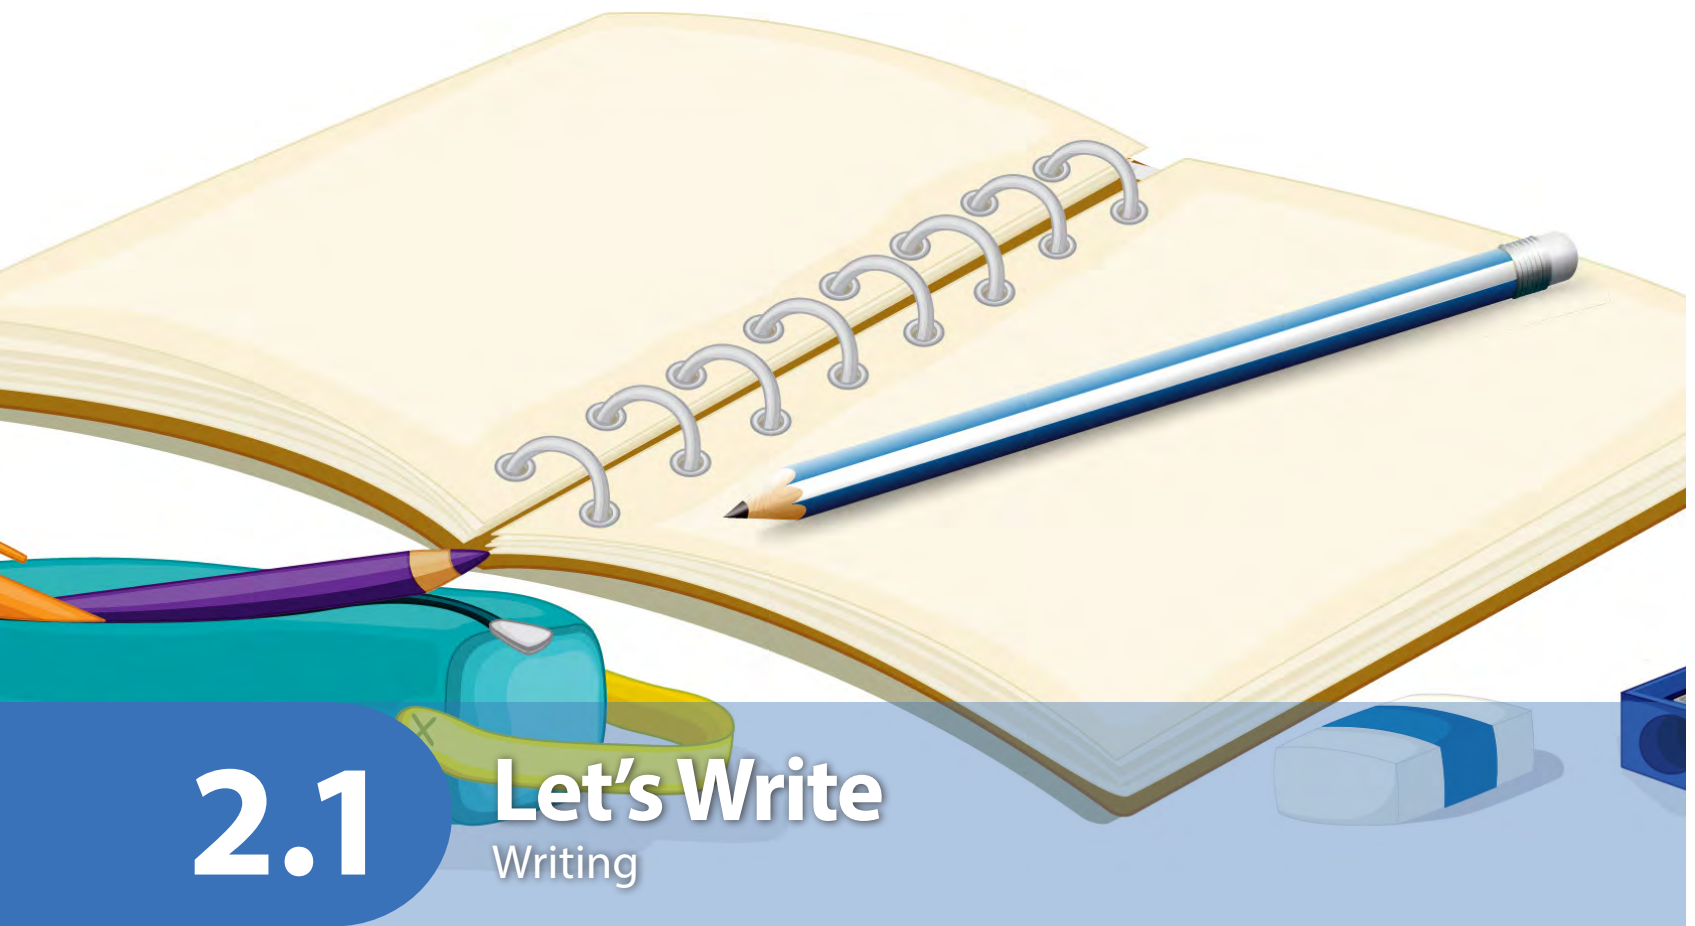

- L1 - L3** The student will begin to retell a story by looking at the pictures.
- L1 - L3** The student will listen with increasing attention.
- L1 - L3** The student will show interest in books.

Activity

1. The teacher will begin the lesson by reading **LBRY63**.
2. The teacher will probe and ask the students questions about life under the sea, prompting a discussion
3. The teacher will involve the students in a discussion about information that they have learned in other subjects that is relevant to the *Under the Sea* thematic unit.
4. Using **UNS-C8** the teacher will focus on points to talk about creatures, cleanliness, mammals, fish, corals and other ocean-related aspects.
5. Following the discussion, the students will go to their work areas where they will recall their favorite part of the story.
6. The teacher will pass out paper for students to illustrate their favorite part of the story.
7. As students finish their drawings the teacher should encourage each student to stand in front of the class one at a time and share their favorite part of the story.

- Teacher observation of student's ability to use prior knowledge to discuss a story and ability to identify their favorite part of the story by illustrating a picture.

2.1

Let's Write Writing

Materials

- ☐ Crayons
- ☐ Glue
- ☐ Pencils
- ☐ Scissors
- ☐ Popsicle sticks
- ☐ **UNS-S6**
- ☐ **UNS-S7**

Objectives

- L1 - L3** The student will use their tracing skills to practice developing penmanship.
- L1 - L3** The student will follow simple directions in order to complete the task.
- L1 - L3** The students will recognize their own name and trace or write it.

Activity

Teacher Note: The teacher will allow plenty of opportunity for students to work on and develop the hand muscles that are necessary for writing. These are a few good exercises that will help the student develop these muscles: *playing with clay, climbing, ball throwing and catching, cutting off the corners of a piece of paper, cutting along curved lines, cutting lines with a variety of angles, cutting figures with curves and angles, cutting clay with blunt scissors or similar exercises.*

At any level and age this focus group should work on continuously developing the fine motor movements, skills and muscles. The abovementioned exercises should therefore be done frequently.

1. The teacher will begin the activity by passing out **UNS-S6** to each of the students.
2. This is a great activity for students of all levels: **UNS-S6** varies in level of complexity so it is up to the teacher to determine the level of the student.
3. For **L3** students, the teacher should distribute **UNS-S7** to these students for continual practice of handwriting.

- Teacher observation of student's interest and effort while working on fine motor development.

2.2

Magnet Letters

Letter Recognition

Materials

- Large alphabet
- Large handwriting paper
- Magnetic letters
- Small individual white boards

Objectives

- L1** The student will recognize some letters in the alphabet.
- L2 - L3** The student will recognize most letters in the alphabet.
- L1 - L3** The student will be able to name and give the beginning sound to 2 (or more) letters.
- L1 - L3** The student will work, using a variety of tools, to improve letter recognition.

Activity

1. The teacher will have the students recite the alphabet aloud.
2. Next, the teacher will give each student a small plastic bag containing magnetic letters of the alphabet.
3. The teacher will point at a letter on the alphabet line and the students will have to find the matching letter in their plastic bags of letters.
4. When the student finds the correct letter they will raise their letter up in the air.
5. The teacher should repeat this activity several times by pointing at different letters.
6. For each letter, the teacher should ask for volunteers to say the letter's beginning sound, as well as examples of words that begin with that letter.
7. To challenge the students, the teacher may want to write a word on a large piece of handwriting paper or on the board, and the students will look for all the matching letters and put them in correct order.
8. The words used should focus on this unit's theme, Under the Sea.

- Teacher observation of student's ability to recite the alphabet, recognize letters and be able to demonstrate beginning sounds of at least two letters.

2.3

Deep Sea Puppets

Reading Comprehension

Materials

- ☐ Glitter
- ☐ Googly eyes
- ☐ Markers
- ☐ Newspaper
- ☐ Paper bags
- ☐ Rubber bands
- ☐ **LBRY64**

Objectives

L1 - L3

The student will listen attentively to the story and be able to retell the story using illustrations in the book.

L1 - L3

The student will be able to follow simple directions to create their own "Paper Bag Puppet."

L1 - L3

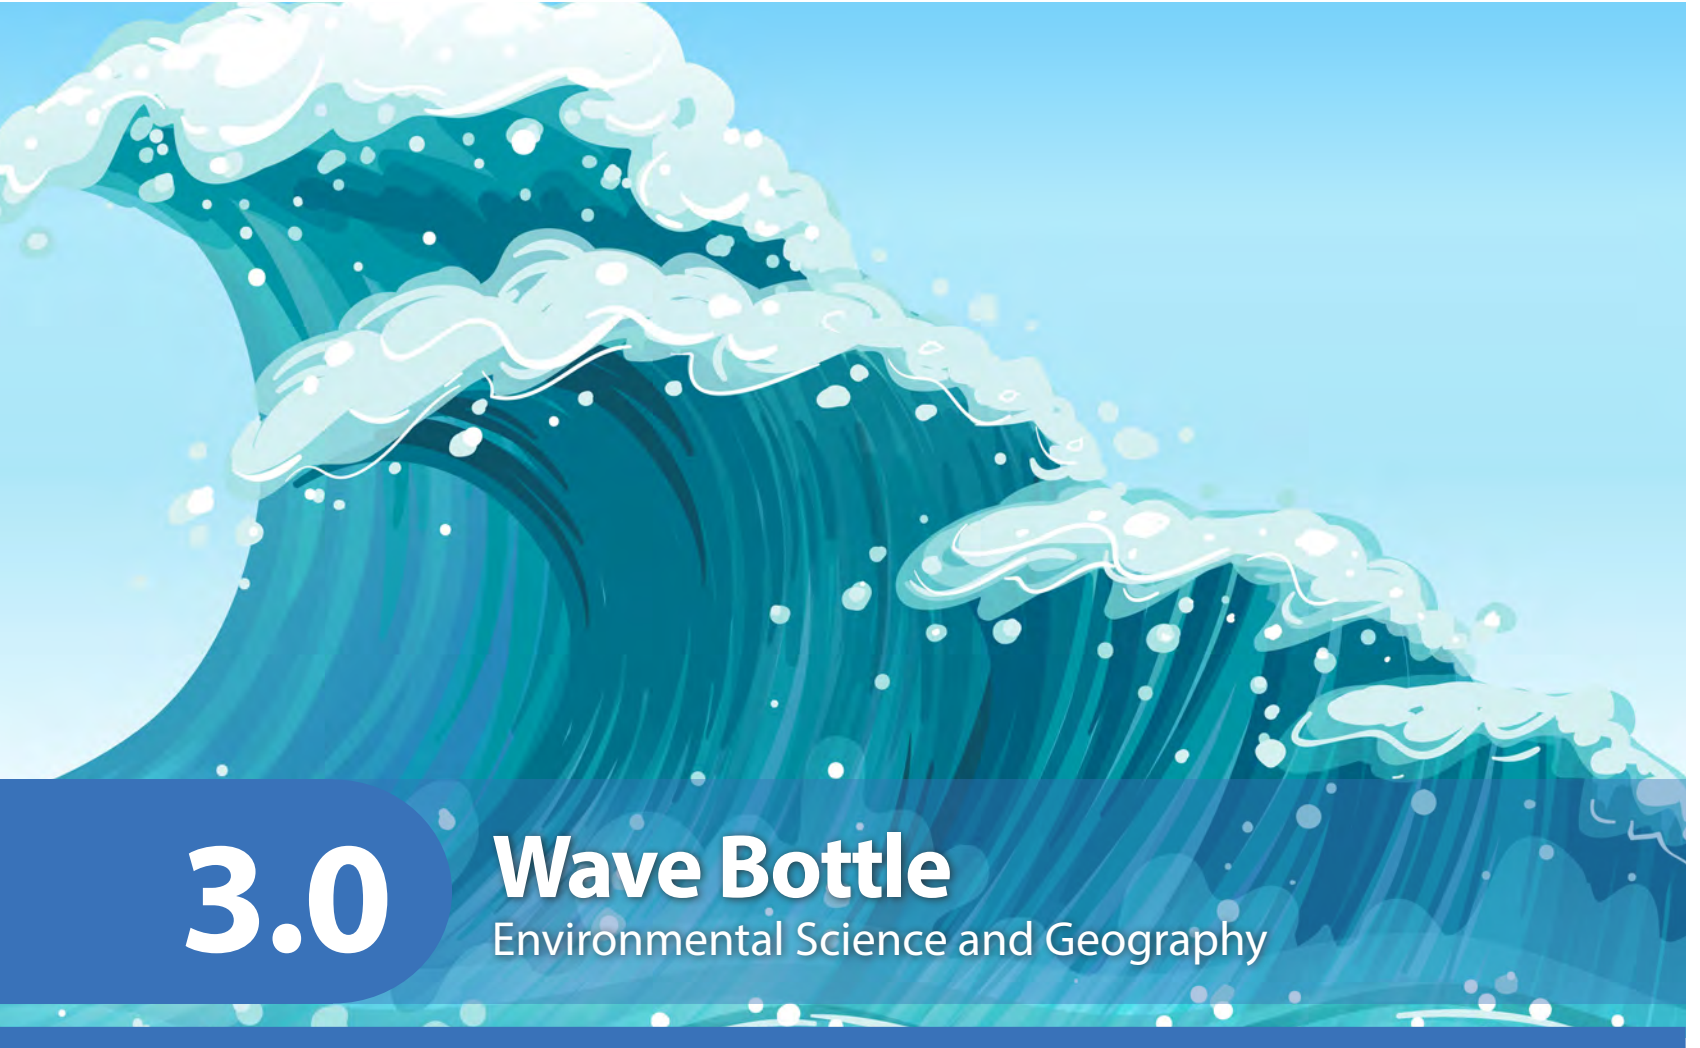

The student will listen and demonstrate understanding through relevant contributions, gestures and actions.

Activity

1. The teacher will begin the lesson by reading **LBRY64**.
2. The student will be encouraged to discuss the story using prior knowledge.
3. The teacher will ask a student volunteer to retell some parts of the story using the illustrations as a guide.
4. The students will go to the work area where they will find paper bags. Students will be guided as they fill the paper bags with newspaper and manipulate them to form a fish. Use a rubber band to close the bag and to form the fish's tail fin.
5. The teacher will allow plenty of time for students to decorate their fish.
6. Once the fish is complete, encourage the students to role play alone or with a friend, creating their own story.

- Teacher observation of student's ability to listen and share ideas about the story.
- Teachers observation of student's ability to follow simple steps to complete a paper bag puppet.

3.0

Wave Bottle

Environmental Science and Geography

Materials

- ❑ Baby oil or vegetable oil
- ❑ Blue food coloring
- ❑ Clean small plastic bottles with lids (one for each student)
- ❑ Super glue
- ❑ Water

Objectives

- L1 - L3 The student will follow simple instructions.
- L1 - L3 The student will make their own wave bottle.
- L1 - L3 The student will actively participate in the class discussion.

Activity

1. The teacher will begin the activity by prompting a discussion about waves. The teacher will probe students about their knowledge and even experiences of ocean waves.
2. The teacher will then begin to explain the wave bottle experiment.
3. The teacher will help to halfway fill each clean plastic bottle with water.
4. Next, each student will tint the water with a few drops of blue food coloring.
5. Then, the teacher will continue assisting the students by filling the rest of the bottle with oil.
6. The teacher will seal each bottle by placing a bit of super glue on the inside of the lid and then tightly closing the bottle's lid.
7. Finally, when the students shake their bottle they will have their very own wave machine.

- Teacher observation of student's active participation during the class discussion.
- Teacher observation of student's ability to work collaboratively with the teacher to create wave bottles.

3.1

Sea Shells on the Sea Shore

Observation

Materials

- Seashells
- **UNS-C9**
- **UNS-C10**

Objectives

- L1 - L3** The student will observe different sea shells and compare them.
- L1 - L3** The student will listen and gradually learn to follow poems/songs regarding the ocean.
- L1 - L3** The student will listen attentively to the story and be able to discuss.

Activity

1. The teacher will begin the activity with a discussion about seashells.
2. The teacher should encourage students to add to the discussion and make connections to their own experience finding seashells, if any.
3. During the discussion, the teacher should pass around seashells for the students to touch and observe.
4. The teacher will shift the discussion by asking the students questions such as: "Do you think any animals live in shells" and "What might live in a shell?"
5. Next, using **UNS-C9**, the teacher will go through some of the creatures that live in a shell.
6. To finish up the activity the teacher will use **UNS-C10** to teach and encourage students to sing along to the songs.

- Teacher observation of student's attentiveness during activity.

3.2

Deep in the Ocean

Oceanography

Materials

- ☐ Atlas
- ☐ Crayons or coloring pencils
- ☐ Globe
- ☐ Glue
- ☐ Large map
- ☐ Magazines and construction paper
- ☐ Paper
- ☐ Scissors
- ☐ **LBRY65**

Objectives

- L1** - **L3** The student will learn about the oceans.
- L1** - **L3** The students will be able to name each ocean together.
- L1** - **L3** The student will listen carefully to the story.
- L1** - **L3** The student will be able to locate one or two oceans on the map.

Activity

1. The teacher will begin the lesson by reading **LBRY65**.
2. The teacher will guide the students in a class discussion about the story. The teacher will gradually focus the discussion on the topic of oceans.
3. The teacher will point out the oceans using a large map, as well as a globe.
4. The teacher will pass the globe around so the students may look closely at the locations of the oceans.
5. The teacher will point out the oceans several times and encourage the students to repeat the names as they say them aloud.
6. Following, the students will go to their work areas to create an "Under the Sea" collage.
7. The students will use magazines to find and locate pictures of the ocean and ocean life to cut out and include in their collage.
8. Once complete, the teacher will hang the collages around the classroom.

- Teacher observation of student's ability to listen to the story and participate in discussion.
- Teacher observation of student's ability to create an ocean-themed collage.

3.3

Keep Our Beaches Clean

Conservation

Materials

- ❑ Black permanent marker
- ❑ Crazy glue
- ❑ Sand
- ❑ Small sea shells
- ❑ Small water bottles
- ❑ **LBRY55**

Objectives

L1 - L3

The student will listen attentively to the story and be able to contribute relevant comments during discussion.

L1 - L3

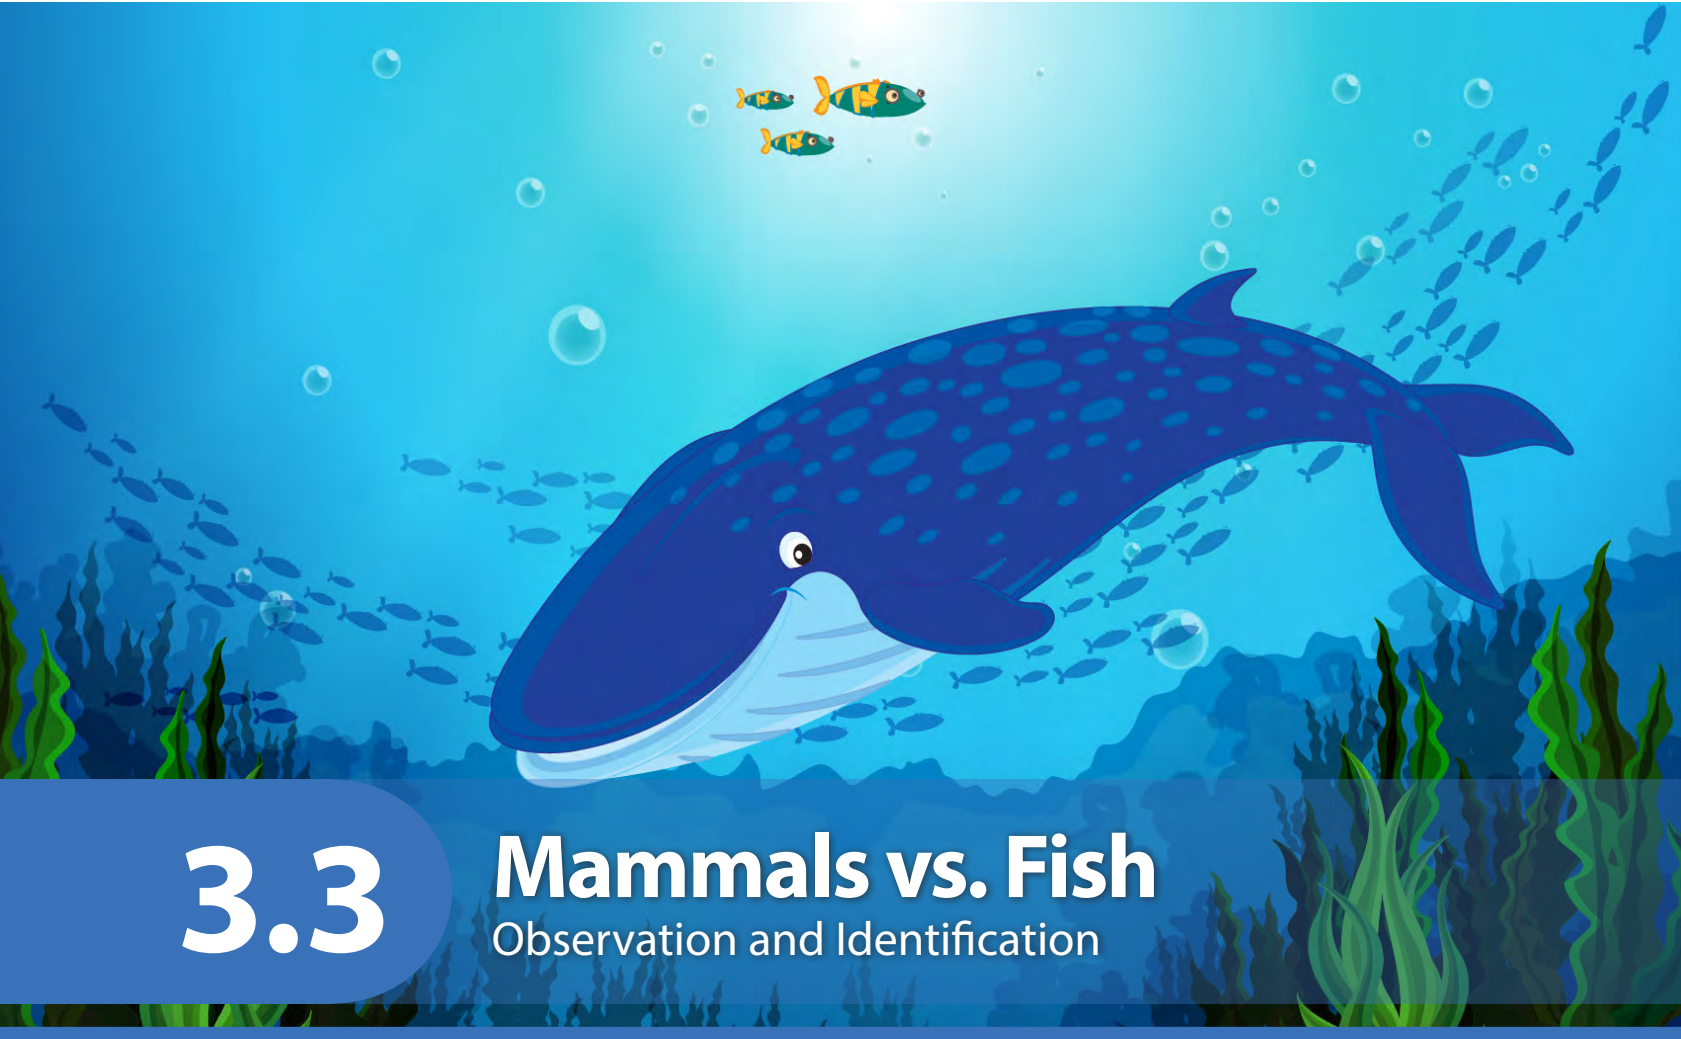

The student will begin developing strong awareness of the importance of keeping beaches clean and the effect humans have on wildlife.

Activity

1. The teacher will begin the lesson by reading **LBRY55**.
2. The teacher will guide a discussion on things people expect to find at the beach (sand, water, sun, trash cans, people, etc.)
3. Next, the teacher will ask the students to imagine water bottles, potato chip bags, aluminum foil, fruit grinds and similar items all over the sand during their beach visit. The teacher will probe students to communicate how they think they would feel to find a dirty beach.
4. The teacher will guide the students to think of ways to keep beaches clean, whether on the sand or by sea in a boat.
5. Following, the students will make their own clean mini beaches using small plastic water bottles.
6. The teacher will work closely with the students to fill the bottles with sand using a funnel.
7. The students will then go to the sea shell bowl to find shells to put in their beach bottles.
8. The teacher will put a small amount of crazy glue on the lid, then tightly close the lid, to keep the water bottle from opening and sand from spilling out.

- Teacher observation of student's ability to listen to the story, and to discuss, with relevancy and proof of new-found awareness, the importance of keeping the world's beaches clean.

3.3

Mammals vs. Fish

Observation and Identification

Materials

- ☐ Construction paper
- ☐ Crayons
- ☐ Pencils
- ☐ Sea creature stickers
- ☐ **UNS-C11**

Objectives

- L1 - L3** The student will be able to identify ocean mammals and fish.
- L1 - L3** The student will be able to discuss the different sea creatures and their respective characteristics.

Activity

1. The teacher will use **UNS-C11** to focus the students' attention on the differences between ocean mammals and fish.
2. Following the detailed discussion, the teacher will go back to some pictures and will encourage the students, as a class, to identify the type of creature.
3. Next, the student will go back to their desk to create an "Under the Sea" diagram.
4. The student will use construction paper and colors to create the appearance of water and each student will have an assortment of sea creature stickers to choose from to creatively add to make their very own ocean scene.

- Teacher observation of student's active participation and ability to work mainly independently to create an "Under the Sea" scene.

4.0

My Own Aquarium

Creative Arts

Materials

- ☐ Blue string
- ☐ Hole puncher
- ☐ Glue
- ☐ Ocean themed stickers
- ☐ Paper plates
- ☐ Plastic wrap or blue cellophane paper
- ☐ Scissors
- ☐ Stapler
- ☐ Tissue paper
- ☐ **UNS-S8**
- ☐ **UNS-S9**

Objectives

- L1 - L3** The student will use creativity to complete the task.
- L1 - L3** The student will be able to follow simple step-by-step directions.
- L1 - L3** The student will continue developing an awareness about sea life.

Activity

Teacher Preparation: 2 paper plates will be required per student; the teacher will cut out the center of one of the paper plates in each pair. The teacher should create their own aquarium to have an example to show students.

1. The teacher will begin the activity by asking the class: "What is an aquarium?"
2. The teacher will then show the class their aquarium and explain to the class how they will all be creating their own aquarium.
3. The teacher will help guide students as needed in order to complete this multi-step aquarium.
4. The student, with the help of the teacher, will fasten/staple/glue 2 paper plates together at the edges.
5. The students will start by picking out a back ground for their aquarium using **UNS-S8**.
6. Seaweed can be made out of tissue paper. The student will glue their tissue paper seaweed to the bottom of the cut-out center.
7. Following, the student will glue in some sea creatures using **UNS-S9** or stickers, into their aquarium.
8. The teacher will help each student cover the cut-out centers with clear plastic wrap or blue cellophane, to resemble water and the glass of an aquarium.
9. Once the "aquariums" are completed, the teacher will hole-punch the paper plates at the top, string them and then hang them around the classroom. The teacher is always encouraged to display the students' work.

- Teacher observation of student's ability to work with the teacher to create their own aquarium.

An illustration of an underwater scene. In the foreground, there are two large, light-colored rock formations. The rock on the left has a dark cave-like opening and is covered with green seaweed and a large, bright red coral. The rock on the right is also covered with green seaweed and has a dark opening. The background is a deep blue ocean with various types of coral in shades of purple, orange, and yellow. Small white bubbles are scattered throughout the water.

4.1

Rocks and Seaweed

Creative Arts

Materials

- ☐ Colored pencils
- ☐ Crayons
- ☐ Glue
- ☐ Markers
- ☐ Popsicle sticks
- ☐ Scissors
- ☐ **UNS-S10**

Objectives

- L1 - L3** The student will draw and color pictures of sea creatures.
- L1 - L3** The student will be able to name the sea creatures they choose to draw and color.
- L1 - L3** The student will use their developing fine motor skills to draw and color.

Activity

1. The teacher should have all the supplies ready for the students.
2. The teacher should encourage students to draw their own ocean-related items or color in **UNS-S10** using their creative skills.
3. The teacher will help the students cut the pictures out and glue them to craft sticks to create hand puppets.
4. The students can use the puppets to retell a story or to create their own original stories.

- Teacher observation of student's ability to draw, color, cut and identify sea creatures, rocks or seaweed.

- ☐ Colored pencils
- ☐ Crayons
- ☐ Heavy construction paper
- ☐ Scissors
- ☐ Sea animals pictures ready to color and cut
- ☐ Small plastic hangers
- ☐ String
- ☐ **UNS-S11**

- L1 - L3** The student will show good behavior when working in groups to accomplish the task.
- L1 - L3** The student will develop fine motor skills when drawing, coloring and cutting.
- L1 - L3** The student will identify animals that live in the ocean.

Activity

1. The teacher will divide the students into groups to work in. Groups will color using **UNS-S11**.
2. The students will cut the pictures out and glue them to heavy construction paper.
3. The teacher will help punch holes in the pictures and tie them to a clothes hanger to make the mobile.
4. The teacher is encouraged to hang these group projects around the classroom.

- Teacher observation of student's ability to work in collaboration to complete the task.
- Teacher observation of student's ability to identify sea animals.

4.3

Saltwater Painting

Evaporation

Materials

- Blue food coloring
- Brushes
- Salt
- Smocks
- Warm water
- Water
- White painting paper

Objectives

- L1 - L3 The student will begin to develop an understanding about water evaporation.
- L1 - L3 The student will use a special water-based mix to create a painting.
- L1 - L3 The student will apply their own creativity to create "Saltwater Paintings."

Activity

Teacher Preparation: The teacher will prepare the following water-based mix of salt and food coloring prior to starting the art activity: mix six teaspoons of salt and three drops of food coloring into one-fourth cup of warm water in a small container and mix well.

1. After setting up the station for students to paint, the teacher will invite students to use the brushes and white paper to paint ocean pictures with the saltwater mixture.
2. The teacher will lay the paintings flat on a table for drying, allowing for a few hours for the painting to completely dry.
3. When the water evaporates but the colored salt remains, the results create beautiful pictures.
4. At this time the teacher will discuss evaporation with students, asking the students questions such as: "what evaporated?" and "what didn't evaporate?"

- Teacher observation of student's ability to use free-form painting and creativity.

4.4

Rainbow Fish

Visual Arts

Materials

- ☐ Coloring pencils
- ☐ Fish-shaped sponges
- ☐ Multi-colored paints
- ☐ Glitter
- ☐ Glue
- ☐ Long strip of butcher paper
- ☐ Permanent markers
- ☐ Scissors
- ☐ **LBRY67**
- ☐ **UNS-S12**

Objectives

L1 - **L3**

The student will listen attentively to the story and be able to use relevant comments to discuss the story.

L1 - **L3**

The student will use creative thinking to create own rainbow fish.

Activity

Teacher Preparation: Prior to the activity, the teacher should draw a large fish-like shape on a long sheet of butcher paper. Then, paint the lower half of the sheet of paper blue to represent the water. As a class project, the class will be creating their own under the sea scape.

1. The teacher will begin the activity by reading **LBRY67** to the class.
2. The students will use the **UNS-S12** to create their own version of "Rainbow Fish." The teacher will encourage the student to use different colors and textured materials, such as glitter.
3. The students will then glue their rainbow fish onto the large fish shape on the butcher paper or into the sea scape.
4. Next, the teacher will have the students dip the fish-shaped sponges in various colors of paint and stamp onto the sheet of butcher paper to finish creating the class' fishy ocean scene.

- Teacher observation of student's ability to use creativity throughout the art activity.

5.0

Scuba Dive Discovery

Gross Motor

Materials

- ☐ Balls
- ☐ Jungle gym
- ☐ Music
- ☐ Open space

Objectives

L1 - L3

The student will perform various gross motor activities which will help in the developing of certain skills.

L1 - L3

The student will use body control and object control to play a game.

L1 - L3

The student will follow simple steps to play with each other in a manner that is acceptable and enjoyable.

Activity

Teacher Preparation: Teacher imagination and creativity are vital in this activity. The teacher should hide various sea-themed toys and decorate around the school's outdoor area.

Instead of having students just walk through the course, have students “jump into the water and swim their way through the activity.” Create a sea kelp forest by hanging green streamers for students to “swim through.” Playgrounds and jungle gyms could be “sunken pirate ships and underwater caves”. Teachers can also create jellyfish with paper plates and streams, having the students “swim” through a swarm trying not to get “stung.”

1. The student will go to the playground for a creative sea-themed “dive.”
2. The students will have to run, skip, walk and pretend to swim while they look for the hidden items.
3. Following, the teacher will allow time for the children to play on outdoor equipment.

- Teacher observation of student's healthy developing gross motor movements and initiative to play and move about in an open area.

5.1

Imitating Animals

Gross Motor

Materials

- Open space

Objectives

- L1 - L3 The student will use gross motor movements to play a game of animal imitating.
- L1 - L3 The student will follow simple safety rules.

Activity

1. The teacher will explain to the students that they will be called upon to act like a certain animal in the wild.
2. Some students will be observers and some will be actors, acting as animals.
3. The observers must guess each animal that is being imitated.
4. Roles will change once most of the observing students have guessed.

- Teacher observation of student's ability to use relevant knowledge to give a convincing imitation.
- Teacher observation of student's participation in a group activity.

5.2

Identifying Sea Creatures

Gross Motor

Materials

- Open space
- **UNS-C12**
- **UNS-C13**

Objectives

- L1 - L3** The student will use gross motor movements to play a game of animal imitating.
- L1 - L3** The student will follow simple safety rules.

Activity

1. The teacher will begin the activity by using **UNS-C12** and reviewing the sea creatures.
2. The teacher will then explain that one student at a time will be selected to choose a flashcard from **UNS-C13**.
3. If the flashcard has a sea creature or any other sea-related object on it, the student must identify the sea creature or sea object by name.
4. If the flashcard chosen has a jumping bean on it, all of the students must stand up and jump around in their spot for 5 seconds.

- Teacher observation of student's ability to identify sea creatures and sea items.
- Teacher observation of student's participation in a group activity.

5.3

Various Activities

Gross Motor

Materials

□ None

Objectives

L1 - L3

The student will continue to develop gross motor skills by participating in specific games and movements.

Activity

Body Parts Dance Party

This body awareness gross motor activity for preschoolers is a game. In the game, the student will identify a body part and then shake it, while dancing a bit. Students will go on to identify and shake their heads, knees, hands, arms and so on.

Ankle Walk

The student will hold their ankles with their hands and walk. This is a good way to improve their coordination and directional awareness.

Red Light, Green Light

A simple way to practice road rules. Green light means go (or run), and red light means stop (or stand).

What Time is it Mr. Wolf?

The 'wolf' stands on one end of the yard with his back turned and everyone else is all the way on the other side. All the students shout: "What time is it Mr. Wolf?" Once the 'wolf' answers with a time, the children would then have to walk steps corresponding to the time (e.g. if it was 5 o'clock, the children would have to take 5 steps). The game continues in the line of questioning until the wolf thinks the students are close, in which case he or she will reply "LUNCH TIME!" and then turn around and try to catch the students. The first student to be caught by the 'wolf' becomes the wolf in the next round.

Statues Game

The teacher will play some music, dance and encourage the students to stand up and dance as well. The teacher will then unexpectedly turn off the music. When the music stops, the students have to FREEZE!

- Teacher observation of student's knowledge of their body parts.
- Teacher observation of student's participation in a group activity.

Additional books to further the curriculum

Commotion in the Ocean. Andreae, Giles, and David Wojtowycz. Wilton, CT: Tiger Tales, 2002. Print.

Secrets of the Seashore. Brown, Carron, and Alyssa Nassner. N.p.: n.p., n.d. Print.

Mister Seahorse. Carle, Eric. New York: Philomel, 2004. Print.

Wish for a Fish. Worth, Bonnie, and Aristides Ruiz. New York: Random House, 1999. Print.

**Additional books do not come included and are not necessary to purchase.*
